ABOUT ME

Software Engineering student at HCMUS with hands-on experience across different types of projects with web apps being the main one. Curious, adaptable, and eager to deepen my technical skills through practical experience.

EDUCATION

University of Science - VNUHCM

Bachelor of Information Technology | GPA: 8.41/10.00

Ho Chi Minh city, Vietnam

Sep. 2023 – Aug. 2027 (expected)

EXPERIENCE

Salesforce Intern Developer

Gimasy Co., Ltd

April 2026 – July 2026

Ho Chi Minh city, Vietnam

- Developed an agentic AI workflow to accelerate Salesforce Org setup from design documents (URD, DB schema), automating repetitive configurations like custom fields, flows, and validation rules
- Studied real implementation docs to understand how business requirements translate into technical configurations
- Worked hands-on with the Salesforce CRM platform, learned writing Apex code to integrate with external services

PROJECTS

YumRecipe | *Java, Android, Spring Boot, PostgreSQL*

Feb 2026 – May 2026

- Built a full-stack Android social app for sharing recipes/articles with a feed, following, and cooking challenges, backed by a Spring Boot REST API (team of 4)
- Shipped the cooking challenge feature end-to-end on Android and server: recipe submissions, voting, server-side search, and a points/leaderboard system with auto-awarded badges
- Developed the social feed and follow system (like/follow toggles, follower-first ordering, discovery flag) and integrated Firebase Cloud Messaging push notifications

WP-Myshop | *C#, WinUI 3, .NET, GraphQL, PostgreSQL*

Apr 2026 – May 2026

- Built a WinUI 3 desktop shop-management app (MVVM) backed by a .NET GraphQL API with EF Core and PostgreSQL, covering products, orders, customers, and reporting (team of 2)
- Built the reports and dashboard pages end-to-end: revenue and product-detail tabs, line charts, date/category filters, and live stats, fixing a timezone bug in the dashboard queries
- Implemented order management (history with pagination, order details, refunds, phone search), a discount program feature, receipt printing, and product sale pricing

Online Bidding Platform | *TypeScript, Next.js, React, Supabase*

Dec 2025 – Jan 2026

- Built a full-stack auction/trading web app with Next.js (App Router), React 19, and Supabase, supporting end-to-end product listing, bidding, and checkout flows (team of 2)
- Developed the payment flow and integrated email notifications via Nodemailer/SMTP; implemented winner highlighting with masked names and a dedicated winning-bid card UI
- Fixed critical data integrity bugs (duplicated and expired products surfacing in the trading list) and contributed UI work across the hero section, product cards, and homepage featured listings

SKILLS

Programming Languages: C++, Java, TypeScript, SQL (PostgreSQL), HTML/CSS

Frameworks: Next.js, Spring Boot

Tools & Platforms: Git, Docker, Linux (Debian), Salesforce

Languages: English (C1 in Listening and Reading — Oxford Placement Test), Vietnamese (Native)
